CCTV SOLAR TOWER

Our Rapid Deployable Surveillance Tower is a high-definition, wired CCTV system, which is easy to reposition as your site evolves. Designed for fast, flexible deployment, it offers all the powerful features of our HD IP Analytic CCTV setup, with added mobility to adapt to changing site layouts and security needs.

- Our visually distinct 6-meter Solar Power Towers come with a full range of HD camera solutions.
- High-efficiency solar panels delivering 900W+ of green and renewable energy.
- Heated lithium battery bank providing 550W+ of stored power
- By utilising state-of-the-art analytical tools, we offer intrusion detection extending between 1 meter and 150 metres of coverage.
- Quick to deploy with our unique lightweight design which allows set up without need for heavy machinery.
- Real-time viewing available through a secure mobile app
- A range of HD Camera offerings to tailor to your own specific requirements.
- Advanced AI analytics for precise threat detection.

EACH TOWER COMES WITH A SINGLE HD CAMERA. AND 2 LONG-RANGE HD CAMERAS WHICH EACH COME EQUIPPED WITH 3 LENSES, IN TOTAL 7 ANGLES OF PROTECTION

LONG RANGE CCTV

Maximise your site coverage with our Long Range CCTV solution, built for distance and precision. Fitted with powerful cameras that deliver clear visibility up to 150 metres, even in total darkness, it's ideal for expansive or high-risk locations. This advanced tower offers a significant step up from standard systems, combining extended range with the reliability of solar-powered operation.

- Fully solar-powered and self-reliant, no external power needed
- 6-metre mast provides elevated, uninterrupted site visibility
- High-output solar array generating over 900W of clean renewable energy
- Heated lithium battery bank with 550W+ storage for day/night operation
- Manually handled unit, no crane or lifting equipment necessary
- Remote live-streaming available for customers to access through a secure mobile app
- 4G/5G dual-network connectivity
- Features 2x Long Range HD CCTV Cameras plus 1x standard HD camera for comprehensive coverage

PIDs (Perimeter Intruder Detection)

Our PID Units deliver long-term protection with battery life lasting up to 3 years and high dynamic range imaging for high quality footage. Equipped with night vision, intelligent false alarm filtering, and a powerful 113dB alarm, each unit is built to withstand all weather conditions and offers secure, real-time access through a mobile app.

- Long-lasting battery performance, up to 3 years on a single charge
- HDR imaging for sharp visuals in all lighting and weather conditions
- 90° standard lens included, suitable for general coverage
- Optional lens upgrades: curtain-style, pet-tolerant, or extended-range beam
- Infrared backlight for clear night-time visibility
- Reliable detection range of up to 30 metres
- Built to endure, IP54 rated and tested from -10°C to +40°C
- Advanced digital filtering reduces false alarms
- Multi-frequency transmission with full data encryption for added security
- High-output siren reaching volumes up to 113dB

WIRED CCTV

Everyone understands the need for CCTV, but high-definition footage is what truly makes the difference. With HD cameras, our monitoring team can quickly verify threats and assist emergency services with valuable evidence when it matters most. Whether it's capturing a number plate or identifying an intruder, sharp, reliable footage is essential for keeping your site secure.

- Crystal-clear 1080p lossless video capture
- Video footage stored securely on NVR for up to 30 days
- Localised and encrypted storage to protect your data
- Full-colour imaging, day and night, for detailed clarity
- Available Analytic Detection range from 1 meter to 150 metres
- AI-powered recognition for people and vehicles

LIGHT UP YOUR SITE. STAY IN CONTROL.

LIGHTING TOWER

The 4m Foldable Lighting Tower offers rapid deployment and intelligent light control, powered entirely by solar energy. Equipped with a 400W LED, it ensures optimal visibility and safety for your workforce on site, with programmable timing for efficient operation.

- 4m Foldable Lighting tower
- Rapid deployment
- Solar Powered
- Intelligent light control
- Time switch
- 400w LED Light
- Perfect for the Health & Safety of your workforce on site

WIRELESS CCTV

Whether your site starts early or finishes late, our cameras adapt to your schedule. Easy to arm and disarm, they give you and your team full control to determine when the system is active. Plus, with a built-in fail-safe, the system automatically arms and disarms at preset times, so you never have to worry about leaving your site unprotected.

- Communication range of cameras extends up to 200 metres away from the hub
- External siren paired with strobe light for clear alert warnings
- HDR technology ensuring crisp images in all lighting conditions
- Versatile 90° multi-purpose lens for broad coverage
- Full control via mobile app, including arming, disarming, and instant alarm alerts with images
- Detection Range up to 30m for People and Vehicles

WIRELESS FIRE SYSTEMS

The fire system is a fully wireless, battery-powered solution designed to deliver quick, reliable communication during site emergencies. Its simple setup and remote monitoring capabilities mean it can be deployed rapidly without any cabling or reliance on mains electricity. Whether protecting vacant buildings or large construction sites, these systems offer flexible customization to meet a wide range of security needs.

- Integration capability with third-party systems such as turnstiles, lifts, and gas monitors
- Instant alarm notifications via Base Station, including text messages and emails
- Wireless system can seamlessly connect to permanent fire safety systems for enhanced effectiveness
- Accurate pinpointing of alarm locations for swift response
- Certified CPR Timber Frame Call Points compliant with HSG168 & JCoP, featuring sounders, strobe lights, and manual activation
- Dust-resistant smoke and heat detectors designed for reliability
- Ability to send fire alert texts to up to 10 contacts
